ALERT CARD

Important information about QUADRIMUNE/CUATRO
(Abacavir//Lamivudine/Lopinavir/Ritonavir 30/15/40/10mg).

Always carry this card with you.

7

Patients taking abacavir, contained in **QUADRIMUNE/CUATRO**, may develop a hypersensitivity reaction (serious allergic reaction) which can be life threatening if treatment with **QUADRIMUNE/CUATRO** is continued. If your child has symptoms from **two or more** of the following groups:

10

- Fever
- Skin rash, with redness or itching
- Nausea or vomiting or diarrhoea or abdominal pain
- Severe tiredness or achiness or generally feeling unwell.

14

15

CALL YOUR CHILD'S DOCTOR IMMEDIATELY. He or she will advise you whether your child should discontinue treatment or not. If your child has discontinued **QUADRIMUNE/CUATRO** due to this reaction, your child must never take abacavir-containing products again as within hours your child may experience a life-threatening lowering of his/her blood pressure or death.

19

20

You should immediately contact your child's doctor if you think he/she is having a hypersensitivity reaction to **QUADRIMUNE/CUATRO**.

22

Write your doctor's details below:

23

Doctor:.....

Tel:

24

If your child's doctor is not available, you must urgently seek alternative medical advice, e.g. the emergency unit at the nearest hospital.
